PHOTO

The advertisement features a large, modern two-story house with an orange-tiled roof and white walls. In front of the house, there is a green lawn and a paved driveway where three cars are parked: a red hatchback, a silver sedan, and a yellow SUV. To the right of the driveway, a blue pickup truck is parked. A small sign on the ground next to the truck reads "Vijaya BANK". On the left side of the image, there is a large yellow banner with the text "Grand Vijaya Housing & Vehicle Loan Carnival*" written in red. Above this banner, another circular graphic contains the text "Limited Period Offer". At the top of the page, there is a horizontal bar with the text "Document processing, Inspection & Documentation charges waived off" repeated twice.

Pana Pre-Uni College is the brainchild of Pana Education & People Alliance (PEPAL), Mangalore. The trustees at PEPAL felt the deep desire to change how we teach and how we learn. Not being satisfied with students taking home just another certificate at the end of the day, the trustees took it upon themselves to come up with an institution that would not just match up to, but also exceed world standards.

MISSION: To provide education that is rooted in traditional values and based on contemporary systems of learning through dynamic, thematic activities and extra-curricular skills. With our emphasis on holistic development, we aim to produce young adults who are not only academically sound but also have the ability to contribute positively to the environment, the society and the nation. Our motto is "Truth Alone Triumphs". The motto is derived from the Sanskrit saying "Satyameva Jayate". The motto emphasizes the importance of truth and honesty in all aspects of life. The motto also reflects the college's commitment to academic excellence and moral integrity. The motto is inscribed on the college's seal and is prominently displayed on the college's website and other communication materials.

VISION: To be a leading educational institution in the field of Management and Engineering.

As a private institution, the best student counsellor and an academic placement cell for students. We offer various courses in Management and Commerce and many more. We also offer various courses such as accountancy, commerce, management, marketing, finance, etc. We have a well-established infrastructure, experienced faculty and a dedicated team of staff members. We believe in providing quality education to our students. We are committed to providing them with the best possible education and support. We are also involved in various extracurricular activities such as sports, cultural events, and social service projects. We are always looking for opportunities to improve and grow as an institution.

SELF MOTIVATED LEARNERS WIN AT LIFE

"There is nothing in the affairs of Men, which, taken at the flood, looks surer for time, omitted, all the expense of their life is burning in shadows and in misery." William Shakespeare in his Play, *The Taming of the Shrew* "Time and Tide wait for no one." *Probably he had no presumption that the next generation would be motivated to take the tide of floods, nor by flood and gloom.*

A. Gokh RAI

Self Motivation is a kind of driving force that encourages an individual to get going. It is a kind of boost to self confidence and inner conscience of a Person. All of us look for some kind of motivation in life. It is almost impossible to face a competition achieve success or accomplish goal without motivation. Scientists define Motivation as our general willingness to do something. It is a set of Psychological forces that compel us to take action. Motivation is often the result of action not cause of it. Many People struggle to find motivation they need to achieve the goals.

Self motivation is a process wherein a Person is able to find ways to keep his or her self motivated always despite challenging times. Experts opine that self motivation is a very important factor in student life as this will help students to visualize things in a positive way. This will also enable them to overcome challenges by developing an attitude that could withstand trials and failures. Numerous studies have proved that students who are more involved in setting their educational goals are more likely to achieve them. When students perceive that primary focus of learning is to obtain external

rewards, such as a grade on an examination, if they often perform more poorly, think of themselves as less competent and report greater anxiety when compared to students who believe that exams are simply a way for them to enhance their skills.

THE KAIZEN WAY TO SELF IMPROVEMENT

Our quest to become better often feels like a roller coaster ride with its proverbial ups and downs. Embracing the philosophy of small, continuous improvement moves us incrementally towards our goal. Rooted in the 2000 year old wisdom of the *Tao Te Ching*, "The journey of a 1000 miles begins with a single step" Kaizen is the art of making great and lasting change through small, steady increments. In Japan, Kaizen refers to constant and never ending improvement. Not only is Kaizen an operating philosophy for modern Japanese business, it's also the age-old philosophy of the warrior class and it has become the personal mantra of millions of successful People all over the world. World class achievers whether in business, sports, or the arts are committed to continual improvement. They understand that in order to succeed in an ever changing world, they must always be learning and evolving. When applied

to self-improvement, in students. Kaizen addresses the breaking down of goals into very small, achievable steps.

MOTIVATION IN EDUCATION

Almost all Students can be motivated in one way or another. Teachers should not task blindly but motivate students to demonstrate behavior that will help them stay motivated and become life-long learners. Motivated students will set individual goals for themselves and modify their behavior to meet such goals. These motivators could end up being the differences between 'finding appropriate study time rather than the student staying up late playing video games and crashing for a test in the morning. Students who are generally academic success take genuine pride in their efforts, recognition and grades. These Students tend to be leaders who want respect and recognition from classmates and Teachers. This mindset also keeps students actively interested in continuing Education. Motivation often leads to improved performance. Students who are highly motivated to learn and excel in class room activities tend to be highest achievers.(2)

SOME GREAT MOTIVATORS

Supreme Court judges in America are held in high esteem by the American People. In case of any crisis like situation People look at the Supreme Court for crisis resolution. The dispute surrounding the closely contested Presidential Election 2000 between George W Bush and AL Gore, the result would have gone either way. As the vote share was almost equal, some States ordered re-count, some asked for manual count as the difference between the candidates was

almost nil. After great deliberation the Supreme Court ruled in favor of George W Bush. This decision was welcomed with equanimity without any doubt by both Parties. In our country the winner would have said that justice has been done while the looser will implore justice. They will doubt everything which is not in their favor, some ask for proof of the Surgeon strike and some others will say that EVM's can be hacked. There is no retirement age for Supreme Court Judges in America. Ruth Bader Ginsburg 84 years, was one of the Judges who delivered the Bush-Al Gore judgment. Replying to a pointed question as to when he is going to retire ?, Justice Ginsburg replied that as long as he is mentally and physically alert he will not retire. As a self motivated soul he will continue to work for some more time. Justice Ginsburg was appointed to the Supreme Court during 1993 when Bill Clinton was the President.

Prof. Stephen William Hawking: He is a noted British Physicist, Cosmologist and Author. A brief History of Time, by Hawking is a bestseller. Stephen Hawking suffered from ALS a rare early onset, slow progressing form of amyotrophic lateral sclerosis, which has gradually paralyzed him. Prof. Hawking now communicates using a single cheek muscle attached to speech generating device. He is the 'Role model for disabled People, delivering motivational lectures and participating in fund raising events.

Jessica Cox: She is a real wonder Kid, who flies Aero Planes just by her hands, but using her legs. She is not doing this to enter into some year Book Records. Her life's ambition was to become a Pilot and fly in the open skies. But

there are strict yardsticks and physical standards to become a Pilot. Destiny has been cruel to Jessica who was born with a major congenital deformity. The child was deprived of its potent tools to lead a normal life. Both hands were not formed at all.

With great incredible self Motivation and hard work, Jessica got her Pilot's license on October 16th 2008, after 3 years of rigorous training in a specially modified Aircraft. She is the world's first licensed "Armless Pilot" and also first armless black belt in the American Taekwondo Association. She did Bachelor of Science in Psychology from Arizona University USA. We could not believe any one becoming a Pilot without hands. Jessica Cox entered into "Guinness Book of World Records for being the only Armless Pilot" in the world.

Elizabeth Taylor: Noted Hollywood Star, with her violet eyes, the spotless skin, pretty lips and raven hair, she was an icon of glamour and beauty. A modern day Queen Cleopatra, beauty of ages who ruled hearts of millions, lived life on her own terms, that included 8 Marriages, indeed, Mother of courage. This much married Diva, had an unswayable response for a pesky Reporter after one of her husbands, Mike Todd expired, "Mike is dead", she said, "what do you want me to do, sleep alone?"

Nick Vujcic: It is impossible to imagine a child being born without Arms and legs. Think of a life without the ability to get up, walk and look after one's elementary needs. Nick Vujcic

born in Melbourne, Australia in 1982 was destined to suffer during his childhood. When he came of age, he used to question the very purpose of his creation with God. But his passion for life and his determination motivated him to succeed. Now this dynamic young achiever is a model for others as he (3) has accomplished much more than many of the well built People achieved in a life time. Nick has travelled around the world delivering motivational speeches. Though his success story continues to resonate the world over, the question "Why I, the one born without arms and legs?" still haunts Nick Vujcic every day.

Mahatma Gandhi is the greatest motivator in the country. Indian freedom Movement gained momentum with Gandhi taking leading role in this non violent Revolution. The Quit India moment of 1942 and non co-operation movement played decisive role for the country to become Independent. Along with Gandhi, Subhash Chandra Bose Jawaharlal Nehru Vallabhbhai Patel, Bal Gangadar Tilak and Millions of other freedom fighters will be your motivators forever.

Some prominent disabled motivators.

- Patrick Henry Hughes, musician born blind and unable to fully utilize his limbs.
- Hirotoh Ochiai, Sport writer and survivor of Tetra-Amelia syndrome.
- Mile Stojkoski, humanitarian and wheelchair ultramarathon runner.

INVITATION TO DISASTER

Dr. B. Rajiva Shetty

Now a days, we frequently come across news of death of young adults due to heart attacks and in *S-O-S* *C-A-S-C* committing suicide. Earlier, children used to bring their parents for treatment to hospital but the reverse is the trend now. If we analyse the pattern and the reason, change in parenting style seems to be one of the reasons for such a situation. Parents on the one side are interfering too much with their freedom during their growing age and on the other side are not giving proper attention to their eating habits and activities. This usually happens in urban India.

The parents admit their children to schools before the age of three years when their organs are not very well developed to cope with the situation. The children before the age of five years need more than ten hours of sleep in the night and a few hours during the day which is very important for proper mental and bodily development. More than this the child needs the parental love and attention during this period. By pushing them to school or babysitting etc., we deprive them of good parental care at this growing age thereby denying the natural childhood happiness. The old system of grandmother telling stories which relaxes their mind is a thing of the past due to nuclear family setup.

A few years ago, the children used to walk the distance to their schools. If the school is far off they walk up to the nearest bus stop. Now because of economic development, cars, private cars and school buses have replaced the public transport system. If there are many students in the locality, parents expect the cab or school bus to stop at each ones gate, instead of common pooling place thereby denying the children the minimum physical exercise. It is being observed that, the children going to the same school or same class do not speak to one another in the presence of their parents, perhaps because of economic disparity. This in turn results in constriction of mind, which leads to so many adverse reactions on the mind and body including narrowing of blood vessels. This is *encrusted apoplexy induced catastrophe*.

These days, selection of schools depends on the number of ranks secured by the schools and not on overall facilities and infrastructures available for the wholesome development of the child. Many of the chosen schools do not have playgrounds. Commercialisation of education has resulted in opening of a school in a residential area foregoing all the norms. The corrupt officials of concerned departments permit opening of such schools without taking into account the availability of infrastructure including playgrounds for opening of such schools.

Many uneducated moneyed parents who speak only the mother tongue or the local

language with their children admit their wards to sophisticated English medium schools. The innocent child who is not able to communicate to the class fellows may become isolated, may stay aloof and finally may go into depression. The parents face a self invited trouble many a time without a remedy.

In secondary schools, the only target of the parents is the academic performance of the child. Every now and then, they compel the child to read, read and read, without allowing them to do any extracurricular activity, which naturally helps the child to relax his mind and body. Some parents do not allow the child even to participate in sports and games. This creates an extra stress in children leading to deterioration of general health. With the struggle and stress, they face the examinations. Finally the results are announced. Unfortunately some children may score a little less than the parent's expectations. For that, they have to face series of unpleasant lectures from their parents which may lead to suicidal tendencies.

Now comes the issue of selection of further educational courses. The children sometimes are not allowed to pursue the course of their

choice instead they have to pursue the course selected by their parents which further puts lot of pressure on them. We have seen children who wanted to pursue engineering were compelled by their parents to take up medical profession. Final outcome will be either disqualification in the middle or take their own time to complete the course. These will demoralise the children further.

With all these eventualities, they enter into a profession chosen by their parents who expect them to make big money in a short time, sometimes resorting to unethical means. Then the moral degradation also commences from here. They do overtime work without bothering about their physical and mental well being. The outcome is well understood.

Now the parents pressurise the children to get married with an alliance without seeking their personal preference. Here also the concerned boy or girl may have to yield to parental pressure, which may lead to matrimonial disharmony and end up with disastrous consequences.

The people say we write our own destiny, but in reality by allowing someone to decide our course of life, we dig our own grave.
